Introduction

The **Surfaces, Interfaces and Coatings Technologies – SICT 2022** event offers a great opportunity for scientists, researchers, and experts active in the field of surfaces and coatings science and technologies (Polymer, material and paint chemists, surface and interface scientists, formulators, designers and policy makers) from both academia and industry to present their newest research discoveries, share insights and exchange the latest ideas.

The conference provides an excellent opportunity for scientists from Europe and from all over the world to meet and discuss the latest advances in surfaces and coatings physics and chemistry, surface engineering/ modification, coatings deposition and functionalisation processes as well as the investigated properties and performances in related innovation fields such as heterogeneous catalysis, two-dimensional materials and graphene, bio-interfaces, nanoelectronics, bio-nanoscience, functional/energy materials, etc.

The three days event will be held at the same dates and venue as the **Plasma Tech 2022** and **Tribology 2022** which access open to all the events participants.

Conference Topics

The **SICT 2022** International conference topics include:

- Surface treatments and coatings deposition and functionalization processes
